

Continual Monitoring of Drug-Dependent Clients

Widely used in criminal justice because of its advantages over other forms of drug testing

The PharmChek® Drugs of Abuse Sweat Patch, through its 24/7 continuous wear time, has deterred drug use, made detecting drug use more efficient and economical than other forms of drug testing, and has provided confidence to criminal justice professionals for over three decades.

Features & Benefits

- Application identifies possible tampering and collects samples that cannot be diluted
- Retains drugs used at any time between application and variable removal date
- 7-10-day wear periods increases the windows of detection for various substances
- Continuous wear acts as a deterrent to drug use while not impeding daily activities
- Hygienic alternative to urine and oral fluid testing reducing exposure to specimen
- Reliable and cost-effective testing for both drug metabolite and parent drug

Continuously Collect & Test for Multiple Substances

Standard & Expanded Panels Along With Add-on Substances

- Amphetamine
- Cocaine
- Marijuana
- Methamphetamine
- Opiates
- Phencyclidine (PCP)
- Hydrocodone
- Hydromorphone
- Oxycodone
