SCRAM®
CONTINUOUS ALCOHOL MONITORING

The World's Most Trusted Alcohol Monitoring Solution

Designed to help the toughest clients remain sober & compliant

SCRAM Continuous Alcohol Monitoring® (SCRAM CAM®) provides 24/7 transdermal alcohol testing for high-risk drunk drivers and domestic violence offenders. It is proven to support long-term behavior change and complements accountability and treatment for alcohol dependence and addiction.

Features & Benefits

Readings are correlated to easily recognizable BrAC & BAC scales

Communicates via standard landline, Ethernet, Wi-Fi, or cellular

Automated testing every 30 minutes eliminates need for client interaction

Single-source admissibility in court requires no secondary or confirming test

Data transmits regularly at scheduled times at least once each day

Continuous monitoring 24/7 eliminates windows of vulnerability in testing

---

Random vs. Continuous Testing for Higher-Risk Clients

Continuous Monitoring is Key for Higher-Risk Clients

Alcohol metabolizes quickly, which means clients can drink around EtG and breath tests.

PEAK BAC .095

Client starts drinking

Client is sober

Breath test

Breath test

5 p.m.   6 p.m.

6 a.m.   7 a.m.

SCRAM CAM detects the entire drinking event by monitoring every 30 minutes, 24/7.

Random tests can easily miss drinking events.
