

A Flexible Home Curfew System With Reliable Tamper Technology

The smallest radio frequency curfew
base station footprint in the industry

SCRAM House Arrest® is optimized to work with today's home communications as an effective curfew and house arrest monitoring solution for low-risk offenders, providing required supervision while allowing clients to remain accountable for their actions.

Features & Benefits

Multiple modes of tamper detection: cut strap detection, temperature and IR detection

Non-volatile memory stores up to a month's worth of data and messages

Dual-antenna base station designed to ensure communication is maintained

Options for variable ranges and permitted out-of-range settings

One-year field-replaceable battery and quick installation reduces touch time

48-hour backup battery ensure continued monitoring even during power outages

House Arrest Built for Today's Homes

Works With Any Home Communication System Transmits Over Any Available Communication Method

- Less than 50% of homes have a landline
- Over 85% of homes have broadband internet
- More than 75% of homes primarily use Wi-Fi
